INDOOR COVERAGE OF A BUILDING

THE OFFICES OF THE PERNOD RICARD COMPANY 100% CONNECTED

THE PROJECT

The Union Investment company, owner of the new “Grand Central” building near Saint-Lazare station, called upon Axione's expertise to provide an indoor coverage solution in the Pernod Ricard offices. A request that demonstrates our ability to provide a reliable, bespoke solution for multi-operator mobile connectivity.

83

RADIO ANTENNAS INSTALLED

100%

OF OFFICES WITH COVERAGE

The challenge:

In 2019, Axione was entrusted with providing a multi-operator 3G and 4G mobile coverage solution for Union Investment in the new Pernod Ricard offices, as well as in the building's common areas.

Our teams installed **83 radio antennas over 4 months, providing all French and international employees optimal connectivity throughout the whole premises.** Employees have access to several common areas where they are also able to fully maintain their connections during breaks.

“ Axione's teams seamlessly conformed to the tenant's development schedule and displayed flexibility that allowed all project stakeholders to meet their respective delivery commitments. ”

Charles Blandigneres, Union Investment Real Estate Project Director

AXIONE'S SERVICES

Design of the indoor coverage structure

- Bespoke design and engineering study

Installation

- Installation of all passive and active components of the radio infrastructure to provide all employees working in the offices with optimal coverage.
- Seamless integration of the antennas.

Execution

- Optimal 4-operator coverage.
